

# THE EMPEROR *with* LINER

*Boot available in 6 colors, size 8 through 3*

[butlerboot.com](http://butlerboot.com) /    

## Versatility

Fits over the foot or over the shoe. The Butler Overboot System can be used with or without the liner, depending on whether the child wants to wear them over the foot or over the shoe. Warm in the winter, cool in the summer.

## Performance

Waterproof and insulating. Butler uses a TPE compound, a consistent high performer in cold temperature crack tests and slip & wear tests. The accordion pleat locks in the foot or shoe.

## Boot Construction

The overboot is made from one mold, therefore no gluing or stitching parts together causing leaky seams. Lead and Phthalate free.

## Liner Breathability And Comfort

The Butler liner 3-part lamination ensures superior breathability and long term comfort in cold and warm weather.

- 1- The inside layer is a polyester base tacliner. This ensures that moisture is wicked away from the foot. This layer is also coated with Agion<sup>®</sup>, the best performing antimicrobial on the market. Built to combat odor causing bacteria and resist fungal mold and mildew.
- 2- Breathe Right<sup>®</sup> breathable 15mm compression foam is the latest in breathable technology, providing the ultimate comfort and insuring a quick drying time.
- 3- The outside lining material is a Skyline polyester fabric increasing the wicking effect and providing lasting durability.

## No Adhesives

Contrary to other manufacturers, we use heat and NO adhesives for the liner lamination. This insures improved breathability & eliminates toxic substances.

## Dual Density Footbed

To complete the liner we have inserted a dual density footbed, also coated with Agion<sup>®</sup>, to maximize the child's comfort while insuring a snug and stable foot performance.

## Machine washable
